REASONS FOR ALLOWANCE

Response to Arguments

Applicant's arguments, see page 8, filed September 19, 2005, with respect to claims 1-5, 7-15 and 17-22 have been fully considered and are persuasive. Therefore, the rejections on claims 1-5, 7-15 and 17-22 have been withdrawn.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or reasonably suggest a cardiac rhythm management device with one or more sensing channels for sensing intrinsic cardiac activity and for sensing evoked responses to paces; a pacing channel for delivering paces to a cardiac chamber; a controller for delivering paces to the cardiac chamber in accordance with a programmed pacing mode, the controller including a memory for program and data storage; wherein the controller is programmed to record physiological data from a sensing channel in memory such that older data is overwritten by newer data; wherein the controller is programmed to detect a death event if no intrinsic cardiac activity has been detected in a previous M second interval, if no evoked responses to paces have been detected for the previous N delivered paces, and if a pacing artifact is detected when a pace is delivered; and, wherein the controller is programmed to cease recording of physiological data upon detection of a death event, in combination with the other elements in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
